1. INTRODUCTION

This is a document for beginning with ease. Sometimes I felt disturbed by the structures of the L^AT_EX document. I don't know how to reset the arranges among paragraphs, and some environments crash with each other.

The structure of documents:

- (1) document class;
- (2) packages;
- (3) symbols, containing math operators and other symbols;
- (4) global settings;
- (5) blocks for special features;
